## PROJECTS

**Portfolio Webpage:** Was developed in React.js (hooks), using MUI, and Bootstrap, also implemented EmailJs, to avoid the need for a server side.

**The Gym App:** This is a web app that was developed in React.js (hooks), with MUI and used an external API to retrieve the exercises info.

### DIY Searcher:

Web app that was developed in React.js (hooks), with Tailwind, using an External API to retrieve YouTube videos based on a search.

### ONGOING PROJECT:

**Car Care Tracker:** This is the current project front-end is working right now, and the integration with Auth0 for the authentication in a MERN stack, it's not fully online yet.
